

Dishwasher Dirt

How much detergent should I use?

If you have a full load of dishes that are extremely dirty, you will want to fill the soap dispenser. However, if you have a full load that is lightly soiled, you can use much less detergent and still have sparkling clean dishes. Remember, if you have an older dishwasher or a standard model, you may not get the cleaning results that you hope for. Talk to your appliance professionals and they will help you find the best model to fit your lifestyle and budget!
