

Frequently Asked Questions

Coffee Systems

- **Can I use flavored coffees in my whole bean coffee maker?**

No. The extracts used to flavor coffee can gum up the grinder in your coffee maker.

- **What do I do with the coffee grounds that build up in the machine?**

Regarding coffee machines: empty your coffee grounds (biscuits) into your garden for a rich compost.

- **Any concerns with milk being run through the coffee machine?**

Always clean components that have had milk run through them after use.

- **Do you need to use filtered water in your coffee machine?**

Yes whether your unit is plumbed or self contained, the water going in should be filtered. Not filtering can seriously affect the taste of your coffee as well as increase the frequency of the maintenance cycle. With any product that uses water, i.e. steam ovens, ice makers, coffee makers, hot and cold water dispensers.
